ABOUT US

ARMA FIXING SYSTEMS established in 1980, as an innovative and dynamic company has been serving to its customers from various sectors such as automotive, home appliance, machinery, agriculture, marine, heating, ventilation, air conditioning and construction in a plant of 7.000 m² covered area.

ARMA is the right partner in the field of fastening and fixing technology for integrated solutions from development to production. ARMA produces the molds in its own premises with an expert staff. Therefore the desired quality is achieved at lower costs in shorter periods.

ARMA has IATF 16949 certificate which complements the quality assurance system established many years ago according to ISO 9001. The company's main principle is to provide unmatched quality and timely delivery with optimum price for %100 customer satisfaction.
