

BANTBORU SAN. VE TIC. A.S.

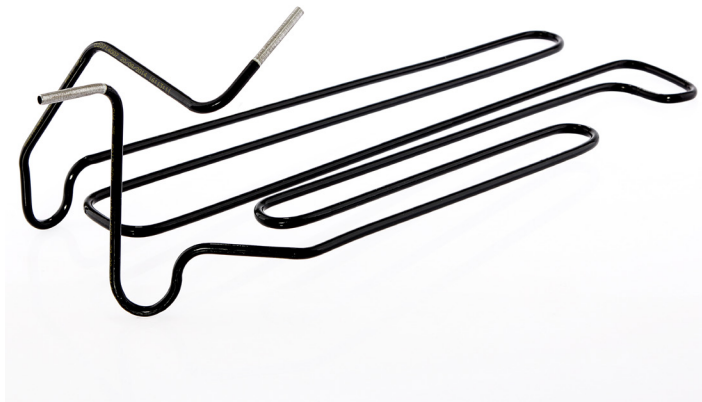

ABOUT US

BANTBORU is the leading company in Turkey supplying steel tubes for the automotive and for the home appliances industries for its global OEMs and their Tier1s.

BANTBORU has been producing double wall copper brazed steel tubes since 1972. Thanks to the inhouse developed technology to produce double wall tubes used indispensably in gas and fluid transfer systems, BANTBORU became the pioneer company in Turkey and one of the few companies in the world in this field. BANTBORU started to manufacture single wall tubes in 2009 in addition to double wall tubes. It aims to have a strong position in the home appliances industry as well as the automotive industry.

BANTBORU has a coating plant for its products' coating operations. To meet the requirements of rapidly growing automotive industry, coating plant uses its Zinc, PVF and PA tube coating facilities in addition to steel copper coating.

BANTBORU proved itself in the field of innovative work by taking R&D Center approval from the Ministry of Science, Industry and Technology in April 2015, and aims to strengthen its place as a global player.

Company PRODUCTS
