

DEVOTRANS ELEKTRİK MAKİNELERİ SAN. VE TİC. LTD. ŞTİ

ABOUT US

DEVOTRANS has been producing electric, electronic and mechanical test devices since 1960.

Today, DEVOTRANS focuses on the manufacturing of quality control test devices at international standards. DEVOTRANS supplies around 600 types of quality control test devices of its own design and manufacturing to more than 50 business branches.

DEVOTRANS is proudly the first and only manufacturer of a number of products in Turkey. DEVOTRANS carries out customized designs always sticking to the standards and delivers turn-key test laboratories.

DVT DEVOTRANS designs its products under its own organization and manufactures them in its own facilities.

Besides its over 600 standard design products, DVT DEVOTRANS also undertakes custom designs and productions.

Such custom designs may be of the nature of developments built on existing designs or totally new creations.

Thanks to its knowledge and experience in the field of design, DVT DEVOTRANS is capable of meeting a major part of the test equipment requirements of a number of different sectors.

DVT DEVOTRANS exports its products to 72 countries. Thanks to an expanding network of distributors, its foreign sales increase every passing day.
