

KARE METAL FORM SAN. A.S. (VERTIGO WHEEL)

ABOUT US

The Company Kare Metal has 2 brands, Vertigo Wheel and Carre Wheel Design; Vertigo Wheel is a custom design alloy wheel company offering Premium quality alloy wheels for passenger cars, SUVs, pick-ups and commercial vehicles within the size range of 15"-23" made in Europe.

The wheels are designed by our experienced and enthusiastic Design Team and go through various Product Simulation processes before production.

The wheels are produced at our TUV certified production facility in accordance with E.T.R.T.O. and ECE standards. Our wheels are made to meet the highest quality standards.

Our second brand Carre Wheel Design is a Project management company supplying alloy wheels and offering full service to its customers, leading alloy wheel brands all over the world, from design to production, quality and logistics. Carre Wheel Design takes the Project from start-up, offering the whole Project Management to its customers, including Design&Engineering, Tool making, Production, Quality Tests and Logistics. The company owns a plant with high precision wheel casting/machining/painting capability and a production capacity of 400.000 wheels/year exporting wheels to more than 15 countries.
