

# ORGANO KIMYA

## ABOUT US

First established as Üçpa Otomotive in 2003, Organo Kimya A.Ş. Group started to widen its operational field and started to carry on marketing under the same name in 2013.

### Performance, development and latest technology.

Our facilities that are established on a 30.000 m2 production and 4.000 m2 warehouse area, are providing full service that includes OEM and Aftermarket sector. All our facilities are producing depending on the high automotive standards.

With long lasting and dependable machine trails, our factory produce its own rubber. The rubbers are later tested in material and performance laboratories that are equipped by high technology.

### Large product range and dominant power in sector.

As a system supplier, we are equipped with multi armed system hose, Blowmolding plastic hose and Pipe production units.

For producing worldwide quality rubber, a blending production facility investment was also made. Our factory works as a developer supplier with the biggest automotive manufacturers in the world. Latest technological machine equipment trails and the perfect staff makes us the leading company in the sector.
