

SUPTEX

ABOUT US

Suptex was founded in 1967 to provide a solution to the industry at a time when rubber sealing elements were very limited in terms of variety and availability. Today, we continue all our design, production, R&D and sales activities in our factory in Tuzla, Istanbul.

From cold sheet metal forming to rubber compression, from dough forming to plastic injection, we produce all our production tools in our own Mechanical Workshop with CNC machining center and CNC lathes with CAD / CAM support. We take relevant national and international norms as reference in all our technical activities, including design and production.

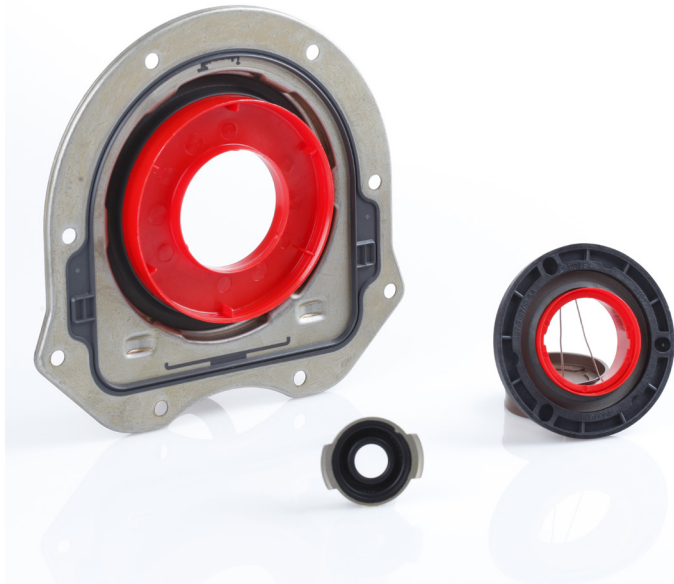

We carry out national and international related standards in our all technical operations, including product design and manufacturing.

Manufacturing processes are carried out all in our roof, with the exception of supplying raw materials. Purchased raw rubber as bales leaves the workshop as an end product ready to put shelves.

Whole process runs in compliance with the ISO 9001, EN 9100 and IATF 16949 Quality Management Systems standards, and also ISO 14001 Environmental Management Systems and ISO 45001 Occupational Health and Safety Management Systems standards under the supervision of the audit firm.

We have more than 6,000 different rotary shaft and fluid seal products. To provide such lots of products for the domestic market, we use a national network of our distributors in Turkey.

And we export our products to tens of different countries in Europe, Middle East, North Africa, America and Asia.

Company PRODUCTS

- AXLE SEALS
- ENGINE SEALS
- PTFE CASSETTE SEALS
- PTFE LIP SEALS
- GEARBOX SEALS
- MIXER SEALS
- TRACTOR SEALS
- INDUSTRIAL SEALS
- HYDRAULIC & PNEUMATIC SEALS

CERTIFICATES

- ISO 9001
- ISO 45001
- ISO 14001
- IATF 16949
- EN 9100
