ABOUT US

MSK STEEL FORGING, has been successfully in the hot steel forging industry for over 45 years. Founded in 1995, MSK Çelik Dövme is an integrated steel forging factory in Bursa / Karacabey with 35.000 m2 total area and 25.000 m2 closed area mold, forging, heat treatment and machining workshops. In the automotive sector, we produce cardan drive-shafts, slide shafts, drive flanges, crank shafts, connecting rods, pistons, hinges, rod heads. MSK is a forging and machining company that produces forged parts between 0,2 kg - 10 kg with hammer and press lines. IATF 16949, TS EN - ISO 9001: 2008 and ISO 14001: 2015 offer products that meet customer quality expectations at competitive prices to world markets with efficient and dynamic production management with international standards. It exports about 55% of its production to Germany, Mexico, Brazil, Spain, Hungary, Italy, Netherlands, Romania and France. MSK continues to grow with its young, dynamic and motivated staff, experience and technological investments from the past
