

TELSAMA METAL SAN. VE TIC. A.Ş.

ABOUT US

Since 1996, Telsama has been producing parts according to drawing and special parts made from almost any material to industrial partners at home and abroad.

This success story is based on the fact that we have a very good knowledge of the most important procurement markets in Europe and USA.

With raw material, labor and delivery costs increasing, it is inevitable that manufacturing companies in the Europe and USA are finding it difficult to maintain their profit margins, We believe we can provide a much superior service than you may currently enjoy.

Telsama understand and believe that their customers deserve quality, outstanding service, and the very highest level of customer care in order for that customer to succeed.

As partners in profit, we are able to carry stock of your clips, springs or wire products in our warehouse. This allows you to reduce your stock and enjoy a shorter lead time from order to delivery.

More importantly, our prices are extremely competitive and you will most certainly enjoy a reduction on the prices of springs or wire shapes that you currently buy.
